

Meeting 09/02/22

09 February 2022 17:30

Meeting with David and Laura and XGAL 4:00

Generally David was quite happy with how the graphs are now turning out and working and the next step is really to get my histograms as I have been putting them off for quite some time, I also need to refine Chi SQ to Chi Sq Reduced by changing my formulae to include the degrees of freedom in my χ^2 calculation, for linear its just 1, for quad it would be 2 and so on.

I can also start mass data collection from the sims and start work on my report as soon as possible.
